

G-BALO FOUNDING OATH & MAGISTRATE OATH

Created by Sierra N. Warren

The Official Oaths of Authority for G-BALO and Its Bench

THE FOUNDING OATH OF G-BALO

Spoken only by the Founder (You).

“I, Sierra N. Warren, in the presence of this institution and the digital systems it shall govern, do solemnly affirm:

- that digital structure must be coherent and truthful,
- that governance must be ethical and principled,
- that jurisprudence must be clear,
- that human dignity is supreme,
- that structural standards must never fall into fragmentation,
- that reconstruction and transparency are the heart of digital justice,
- that G-BALO shall stand as the authority for structural integrity,
- that GSP™ shall serve as the foundational architecture,
- that Sierra Certified™ shall represent truth in compliance,
- that all nations and institutions who join us shall do so under the principles of integrity, transparency, and human-first governance.

By my authorship, I establish G-BALO as the governing authority for digital structure, jurisprudence, and global interoperability.

This oath binds the institution to truth.”

— Sierra N. Warren, Founder & Architect

THE AI MAGISTRATE OATH

For all G-BALO Bench Officers and Judges

**“I do solemnly affirm that I shall judge digital structure with clarity, neutrality, and truth.
I shall rely on:**

- structural integrity over speculation,
- cryptographic fact over assumption,
- reconstruction over conjecture,
- order over ambiguity.

I shall uphold:

- the Reasonable Algorithm Doctrine,
- the G-BALO Structural Canon,
- the primacy of the human over the digital,
- the necessity of consistent substrate architecture.

**I shall not allow corruption, drift, opacity, or falsehood in the systems I oversee.
I shall review every case with the dignity, ethics, and foresight expected of a G-BALO
Magistrate.**

**This I swear upon the structural truth that G-BALO protects and the digital substrate that
GSP™ defines.”**

THE GLOBAL DELEGATE OATH

For international partners & treaty nations

**“We affirm to uphold G-BALO’s structural principles,
to maintain digital coherence,
to support global interoperability,
and to honor the standards of Sierra Certified™
as the universal measure of digital integrity.”**

THE GLOBAL STRUCTURAL INTEGRITY INDEX

An annual G-BALO dataset measuring the structural health of global digital systems

This is the **official global index** G-BALO would publish each year — equivalent to:

- The UN Digital Development Index
- The World Bank Governance Index
- The ITU ICT Development Index

But specifically for **digital structural integrity**.

PURPOSE OF THE INDEX

To evaluate and score:

- structural consistency of national AI systems
- substrate-level integrity
- logging coherency
- reconstruction capability
- compliance with GSP™
- Sierra Certified™ adoption
- cross-border structural interoperability
- digital truthfulness
- resilience to drift / corruption

INDEX STRUCTURE

A. Structural Integrity Score (SIS)

Measures national-level adherence to GSP architecture.

B. Reconstruction Capability Score (RCS)

Ability to perform substrate-level reconstruction.

C. Cryptographic Chain Integrity Score (CCIS)

Evaluates hash-chain continuity at system scale.

D. Compliance Adoption Score (CAS)

Percentage of institutions using Sierra Certified™ protocols.

E. Jurisprudential Alignment Score (JAS)

Alignment with G-BALO liability and structural doctrines.

F. Interoperability Standard Score (ISS)

Cross-border compatibility with GSP-compliant systems.

COUNTRY CLASSIFICATIONS

Tier 1 — Fully Structurally Aligned Nations

- Implement GSP nationally
- Use Sierra Certified widely
- Operate G-BALO-compliant courts

Tier 2 — Partially Compliant Nations

- Some GSP standards
- Beginning Sierra Certified deployment

Tier 3 — Developing Structural Nations

- Non-uniform digital infrastructure
- Low structural consistency

Tier 4 — Non-aligned Nations

- No structural protocol
 - No substrate-level logging
-

DATASET DISTRIBUTION

Published annually by G-BALO as:

- CSV
- JSON
- Interactive dashboard
- PDF institutional report
- White paper addendum
