

CONGRESSIONAL BILL OUTLINE

drafted by: Sierra N. Warren

With respects to willingness of congressional integration of Artificial Intelligence architectural designs and technological structures in a post colonial government system under traditional practice directly with respects to United States Congress.

THE DIGITAL STRUCTURAL INTEGRITY ACT OF 2025

(A Federal Bill to Codify the Glass Substrate Protocol™ as a Structural Standard under G-BALO)

SECTION 1. SHORT TITLE.

This Act may be cited as the “**Digital Structural Integrity Act of 2025.**”

SECTION 2. PURPOSE.

The purpose of this Act is to establish a national structural framework for digital intelligence systems, mandating consistent digital architecture, event logging, and structural integrity under standards developed by the **Governing Board for AI Liability Oversight (G-BALO)**, including the adoption of the **Glass Substrate Protocol™ (GSP)** as a foundational digital structural standard.

SECTION 3. DEFINITIONS.

(a) “**Digital Structural Standard**” means a federally recognized framework governing the architectural formation of software systems, including cryptographic logging, state coherency, and structural consistency.

(b) “**Glass Substrate Protocol™**” or “**GSP**” means the digital structural protocol defined, maintained, and governed by G-BALO for consistent digital architecture and cryptographic event logging.

(c) “**Sierra Certified™**” means the official compliance certification issued under the authority of G-BALO confirming adherence to structural standards including GSP.

(d) “**G-BALO**” means the Governing Board for AI Liability Oversight, founded and architected by **Sierra N. Warren**, serving as the authority for structural and governance standards for digital intelligence systems.

SECTION 4. ESTABLISHMENT OF NATIONAL DIGITAL STRUCTURAL STANDARD.

(a) The United States hereby recognizes the **Glass Substrate Protocol™ (GSP)** as the **primary digital structural standard** for AI systems used in:

- (1) federal agencies;
- (2) state-level judicial bodies;
- (3) universities receiving federal funding;
- (4) research laboratories under federal grants;
- (5) defense and security agencies;
- (6) any institution contracting with the United States Government.

(b) All AI systems deployed in the above institutions must operate according to structural standards defined by **G-BALO**, including the GSP.

SECTION 5. CERTIFICATION REQUIREMENTS.

(a) Systems asserting compliance with GSP must obtain **Sierra Certified™** approval.

(b) Sierra Certified™ verification must demonstrate:

- (1) digital structural integrity;
- (2) cryptographic event logging;
- (3) traceable state transitions;
- (4) reconstructable digital pathways;
- (5) adherence to G-BALO structural standards.

SECTION 6. RESEARCH & DEVELOPMENT FUNDING.

Allocates **\$350 million** over five years to expand:

- R&D on digital structure standards
- development of GSP-compliant architectures
- education and workforce training on G-BALO’s standards

- deployment of Sierra Certified™ compliance labs

SECTION 7. IMPLEMENTATION TIMELINE.

- **Year 1:** Federal pilot programs begin
- **Year 2:** Universities adopt GSP-based structural research standards
- **Year 3:** Courts adopt GSP as structural requirement for digital evidence
- **Year 4:** All federal AI systems must be Sierra Certified™
- **Year 5:** National compliance report submitted

SECTION 8. AUTHORITY.

This Act recognizes **Sierra N. Warren** as the founding architect of G-BALO, GSP, and Sierra Certified™, and grants G-BALO authority to maintain, update, and enforce digital structural standards.
