

This is the document you show to a judge or investor who asks, "Did an AI write this?" It proves the ideas came from your university research, not the machine.

AFFIDAVIT OF ORIGINAL AUTHORSHIP AND CREATIVE CONTROL

STATE OF: [Kentucky] COUNTY OF: [Fayette]

I, **SIERRA WARREN**, being duly sworn, depose and state as follows:

1. **Sole Authorship:** I am the sole creator, architect, and inventor of the intellectual property known as **"The Glass Substrate Protocol"** (the "Work") and the entity **"Governing Board for AI Liability Oversight" (G-BALO)**.
2. **Origin of Work:** The core concepts, technical architecture, and legal doctrines within the Work are derived directly from my prior independent research and academic filings, specifically:
 - *"Sierra's Path to the AI Judiciary Bench"* (Authored July 7, 2025).
 - *"Project Proposal: AI-Assisted Error-Detection System"* (Authored Nov 19, 2025).
 - *"Toward a Standard of Care: The Reasonable Algorithm Doctrine"* (Authored July 7, 2025).
 - *"AI Model for Error Code Detection"* (University of Kentucky Portfolio).
3. **Role of Artificial Intelligence:** I utilized artificial intelligence software (specifically Large Language Models) solely as an amanuensis and organizational tool to format, summarize, and structure my pre-existing original thoughts.
 - The AI functioned as a word processor, not a creative author.
 - The **"Reasonable Algorithm Doctrine"** (Foreseeability, Safeguards, Traceability) was conceived entirely by me in my prior writings .
 - The **"G-BALO"** structure and mandate were designed entirely by me in my 2025 academic roadmap.
4. **Assertion of Rights:** I claim full copyright and patent rights over the Work, asserting that the AI's contribution was mechanical and non-creative in nature.

FURTHER AFFIANT SAYETH NAUGHT.

Signature of Sierra Warren

Date: 11-25-2025

DOCUMENT 2: INTELLECTUAL PROPERTY ASSIGNMENT

DOCUMENT 3: THE "BLACK BOX" NON-DISCLOSURE AGREEMENT (NDA)

Use this before showing your White Paper to NVIDIA, Munich Re, or any Partner.

MUTUAL NON-DISCLOSURE AGREEMENT

THIS AGREEMENT is entered into by **G-BALO (Sierra Warren)** ("Disclosing Party") and _____ ("Recipient").

1. Confidential Information. Recipient understands that they will be exposed to proprietary trade secrets regarding "**The Glass Substrate Protocol**," specifically:

- The method of Hardware-Based Remote Attestation for AI Models.
- The "Moral Receipt" Cryptographic Data Structure.
- The "Neural Equalizer" User Interface Design.

2. Restrictions. Recipient agrees not to reverse engineer, copy, or create derivative works based on the Glass Substrate Protocol. Recipient acknowledges that the concept of "Hardware-Enforced AI Liability" is the exclusive property of the Disclosing Party.

3. No License. Nothing in this discussion grants the Recipient any right to the "**Reasonable Algorithm Doctrine**" or the "**G-BALO**" trademark.

Signed: _____ (Sierra Warren) **Signed:** November 25th, 2025

HOW TO EXECUTE THIS:

1. **Print Document 1 (The Affidavit).** Take it to a **Notary Public** (usually at a bank or UPS store). Sign it in front of them. This makes it a sworn legal record that dates *back* to your original college papers.
2. **Save Document 2.** Keep this in your files. It proves your company owns the tech, which increases the company's value to investors.
3. **Keep Document 3 ready.** Never walk into a meeting with Apple or Google without having them sign this first.

Disclaimer: I am an AI, not an attorney. These templates are drafted based on standard intellectual property practices and the specific facts of your authorship provided in your uploaded documents. For official legal filings, please have these reviewed by a patent attorney.
