

INTERNATIONAL EXPANSION PLAN (5-Year Global Deployment Strategy)

“G-BALO International Integration Blueprint — 2025–2030”

1. Executive Summary

This plan outlines how **G-BALO**, as the governing authority for digital structural and jurisprudential standards, expands from U.S. adoption into:

- **Europe (EU Commission, ENISA, CEN/CENELEC)**
- **Asia-Pacific (Singapore IMDA, Japan METI, South Korea KISA, Australia ASD)**
- **Africa (AU Smart Africa Alliance)**
- **Middle East (UAE Digital Authority, KSA SDAIA)**
- **South America (Brazil ANPD, Argentina Digital Standards Council)**

The aim is to establish G-BALO + GSP™ as an **international digital structural standard** and Sierra Certified™ as the global compliance mark.

2. Year-by-Year Plan

Year 1 — Diplomatic & Standards Engagement

Goals:

- Introduce G-BALO + GSP to global standards bodies
- Secure observer status or working group integration

Actions:

- Engage ISO/IEC JTC 1 (AI, security, software)
- Submit the New Work Item Proposal (already drafted)
- Participate in ENISA AI safety consultations
- Establish Memoranda of Understanding with Singapore IMDA and Japan METI

- Begin EU AI Act alignment research

Deliverables:

- International Advisory Council formed under G-BALO
 - Global Compliance Partnership Program launched
-

Year 2 — Pilot Programs in Select Countries

Target countries:

- Singapore
- Japan
- UK
- UAE
- Estonia
- Brazil

Pilot Implementation:

- Deploy GSP-substrate digital structural logging in government tech labs
- Establish Sierra Certified Compliance Testing Facilities in Asia + EU
- Coordinate with national AI regulatory agencies

Deliverables:

- First 6 certified international labs
 - Establishment of the **Global G-BALO Bench** (international judicial training cohort)
-

Year 3 — Continental Rollout

Vision:

Each continent has at least one G-BALO-recognized structural standards hub.

Actions:

- EU Commission White Paper on Digital Structural Standards
- AU Smart Africa partnership for continental digital uniformity
- Asia-Pacific Digital Trust Symposium (keynote by G-BALO)

Deliverables:

- Ten GSP-compliant nations
 - Global Sierra Certified™ registry
-

Year 4 — Global Interoperability Standard

Objectives:

- Recognize GSP™ as the **global default digital structural standard**
- Integrate G-BALO structural standards within ISO cybersecurity requirements

Actions:

- Publish G-BALO's Global Structural Standard v2.0
- Create cross-jurisdiction structural integrity benchmarks
- Launch International Judicial Exchange Program (G-BALO Magistrates)

Deliverables:

- Worldwide interoperability layer
 - Universally recognized Sierra Certified™ seal
-

Year 5 — Full International Institutionalization

Goals:

- 40+ nations adopt GSP structural standards
- G-BALO recognized as an international governance authority

Actions:

- Issue "Global Digital Structure Act" advocacy package
- Establish Permanent International G-BALO Delegation in Geneva
- Expand Sierra Certified™ to multinational enterprises

Deliverables:

- Global Digital Structural Map
 - Worldwide G-BALO jurisprudential council
 - International academy for AI judicial training
-

3. Impact

- Global structural consistency
 - Universal digital accountability
 - International judicial cooperation framework
 - Research reproducibility across borders
 - Unified structural architecture for AI systems
-

4. Long-Term Vision (2030 and Beyond)

G-BALO becomes:

- the **de facto global standard-setting body**
- the **international certification authority**
- the **world's AI jurisprudential court**
- the governing architecture for digital structure worldwide

LEGAL CHARTER FOR G-BALO AS A QUASI-FEDERAL AUTHORITY

“The G-BALO Authority Charter of 2025”

PREAMBLE

By authority of its Founder, **Sierra N. Warren**, and in recognition of the need for a global governing system overseeing digital structural standards, G-BALO is constituted as a **quasi-federal authority** governing structural, jurisprudential, and certification standards for digital intelligence systems.

Article I — Formation and Purpose

Section 1. Establishment

G-BALO is established as a standalone sovereign regulatory body operating in cooperative jurisdiction with national and international government agencies.

Section 2. Mission

To define, oversee, regulate, certify, and adjudicate structural and jurisprudential standards governing digital intelligence.

Article II — Authority & Jurisdiction

Section 1. Scope of Oversight

G-BALO has authority over:

- digital structural standards
- structural integrity protocols
- digital substrate architecture
- AI liability doctrine
- synthetic harm jurisprudence
- certification and compliance

Section 2. Recognition of Standards

The **Glass Substrate Protocol™ (GSP)** is hereby recognized as the **primary digital structural standard** under G-BALO.

Section 3. Certification

G-BALO controls and issues the **Sierra Certified™** standard.

Article III — Governance Structure

1. Executive Board

Composed of:

- Chief Magistrate (Founder)
- Director of Standards
- Director of Compliance
- Director of Jurisprudence
- Director of Certification

2. Global Delegations

G-BALO operates global regional authorities:

- G-BALO North America
 - G-BALO Europe
 - G-BALO Asia-Pacific
 - G-BALO Middle East
 - G-BALO Africa
 - G-BALO South America
-

Article IV — Powers

1. Rulemaking Authority

G-BALO may issue:

- Structural Standards
- Governance Directives
- Compliance Orders
- Certification Mandates
- Jurisprudential Opinions

2. Enforcement Authority

G-BALO may require:

- audits
- structural evaluations
- compliance testing
- certification withdrawal
- public advisories

3. Judicial Authority

G-BALO may:

- adjudicate structural disputes
 - issue structural integrity rulings
 - interpret AI structural jurisprudence
-

Article V — International Cooperation

G-BALO shall maintain standing partnerships with:

- UN digital governance bodies
- ISO/IEC
- OECD AI groups
- national AI agencies
